SPECIAL**

# Your Labour Team in Audenshaw

## Security Cameras - UPDATE

Earlier this year, **your Labour Team** promised to **keep you updated** on the progress being made to make the M60/Lumb Lane Underpass a safer route.

We reported last time that of the four options put to the Council, probably installing **CCTV security cameras** would be the most viable option.

**Pictured:** Labour's **Jean Brazil** with Cllr. Wendy Brelsford at the underpass

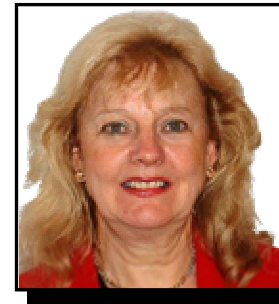

Since then, a number of **CCTV camera units** have been **purchased for Audenshaw**, and a decision will soon be taken as to where they should be located in the town. **Your Labour Team will be pressing the technicians to include the Underpass as one of the locations.**

At the moment, discussions are also continuing about funding the poles to attach the camera units to, and the police are still waiting for the training on the laptops they will be using to access the images from the cameras when they are up and running. **We will continue to keep you updated as and when we have further news!**
